

Stanislav Trocyuk

FRONT-END DEVELOPER

Profile

An ambitious junior front-end developer, full of energy to enhance as a programmer, knowledgeable in user interface, testing, and debugging processes.

I would like to join an advanced company with a modern approach to development and a friendly team. Want to improve my skills and in the future become a full-stack developer.

Education

react front-end developer, IT-incubator | Belarus, , Minsk

JULY 2021 — DECEMBER 2021

Created SPA using React, Redux, RestAPI. Used third-party libraries for React: Axios, React-Router-Dom, Redux-Thunk/Redux-Saga, Formik, Axios etc. Got deeper knowledge of JavaScript, OOP principles, application design principles.

Gained experience in teamwork in the development of various applications.

web-developer, IT-incubator, Minsk

FEBRUARY 2021 — MAY 2021

Created websites using HTML5, CSS3, preprocessors, Bootstrap, Gulp, Perfect Pixel etc.

Professional experince

Unfortunately, I have no commercial experience in the development at the moment.

Languages

I started learning English in 2020. Now I have **Upper-Intermediate level**. Strive for fluency in the language at the Advanced level.

Hobbies

Create React applications using the latest technologies, learning English, reading books, solving tasks in Codewars, also like sports activities.
